Benedict Nursery Co.

185 East 87th St. N.

PORTLAND, OREGON

Established 1890

Fruit, Shade and Ornamental Trees,

Small Fruits, Shrubs and Roses

Descriptive Catalog Furnished on Application

AGENTS WANTED

NOTICE TO CUSTOMERS

ALL PRICES listed herein are f .o. b. Portland, on first-class stock of the grades mentioned.

ORDERS from unknown correspondents must be accompanied by a remittance or satisfactory reference. Orders to be shipped C. O. D. must be accompanied by 25% cash. We will allow 5% off for cash with order.

SUBSTITUTION. Unless otherwise instructed we reserve the right to substitute other varieties of like nature for any varieties ordered which we do not have in stock; except on commercial plantings, when we always obtain the consent of the customer first. We advise leaving the selection of varieties to us, when in doubt as we will use only the best standard sorts.

PACKING. We pack all orders carefully and guarantee stock to arrive in first-class condition, but will not be responsible for same after being received by the customer in good condition.

ALL CLAIMS for errors must be made within 10 days after receipt of goods, when we will cheerfully rectify same.

QUANTITY ORDERS. We furnish 5 of a variety at the 10 rate, 50 at the 100 rate, 300 at the 1000 rate.

GUARANTEE. While we exercise the greatest care in keeping varieties true to name and are ready to replace on proper proof, any that may prove otherwise, it is mutually understood and agreed between the customer and ourselves that we will not be responsible for any sum greater than the purchase price of said trees or plants that may prove untrue. Our reputation for reliable and upright dealing and thousands of satisfied customers are our guarantee.

WE ACCEPT all orders with the understanding that we are not to be held responsible should injury befall the stock from fire, frost, drought or other causes beyond our control.

Our stock is grown on a rich sandy loam free from insect pests and diseases, is thoroughly ripened and possesses an unequalled root system. We grade and pack all orders carefully and our excellent shipping facilities enable us to get orders through to customers in the quickest possible time.

Our long experience in the nursery business enables us to give valuable information to the planter. Questions regarding soil, locations, planting and varieties will be gladly answered.

Address all correspondence to BENEDICT NURSERY CO., 185 E. 87th St. N., Portland, Oregon.

FRUIT TREES

The "Each" rate prevails up to 10 trees.

The "10" rate prevails up to 40 trees.

The "50" rate prevails up to 80 trees.

The "100" rate prevails up to 300 trees.

The "1000" rate prevails on lots of 300 and up.

ORNAMENTALS:**How to Plant and What to Plant**

The average person readily appreciates the need of large and small fruits for the home, but too often cannot see or appreciate the value of flowering shrubs and shade and ornamental trees. Disregarding the comfort which the cooling shade affords on the hot summer days, or the protection from the cold blasts of winter supplied by trees and shrubs, they add a dollar and cents value to the place which must not be overlooked. Furthermore they require practically no care and grow in value and beauty each year.

There are certain basic principles of land-

scaping easily mastered by anyone and with which we should all be familiar. It is our purpose to touch upon them briefly in the limited space at our disposal.

First—"Tie" the house to the ground with a planting of shrubs around the foundation which will break the sharp angle caused by the house meeting the ground and make it "melt" or nestle into its surroundings. For this purpose you will, of course, want the low-growing shrubs, unless your house rests on a very high foundation. In corners where there are no windows you can plant some of the higher shrubs, massing the lower ones in front. As a general rule the prevailing height of shrubs around the rest of the house should be no higher than the bottom windows. In order, however, to avoid monotony, plant slightly higher shrubs between the windows.

Plant masses of shrubbery around the lawn or outer border of your place to give it a distinct outline. Use the larger ones for a background, working down to the smaller ones directly in front. Do not make a stiff formal line but make it wavy or irregular by putting little clumps of shrubbery here and there along the border, using as a center some tall shrub with distinct foliage like the Golden Elder, etc. There is such a variety of shrubs with different colorings and varying blooming periods that with a little forethought, one can have a succession of bloom the entire season. A small yard thus planted looks larger than it really is. Don't plant shrubs, flowers or trees in the center of the lawn, particularly if the place is small. If the yard is quite large, a few trees a little to the front and side of the house, like Cut Leaf Weeping Birch, Norway Maple, Bechtel's Flowering Crab, Red Thorn, etc., are desirable. Plant some tall growing tree in the back corners of the place to frame in the picture and shade trees along the border and front as needed.

The following quotation from Professor Bailey's Bulletin, "Suggestions for Home Planting," tells the whole story in a nutshell and illustrates what we are trying to do.

"The planting of shrubs and trees about the home should have a meaning. Everthing should be so arranged as to make the home the center of the picture. The lawn should be open and should have no meaningless trees and bushes scattered promiscuously over it. The right style of planting makes a landscape even though the area be no larger than a parlor. The other style is simply a collection of curious plants. The one has an instant and lasting pictorial effect which is restful and satisfying. The observer exclaims, 'What a beautiful home' even though the house may be very unpretentious. The other piques one's curiosity, obscures the residence, defies and distracts the attention. The observer exclaims, 'What beautiful lilac bushes'.

"In the summer months we spend more time out of doors than inside. Why not then make our home surroundings more attractive? Scores of persons see the yard to one who sees the living room, yet we spend more in fixing up the latter than the former. In Europe and in the older settled sections of the East it is customary to spend up to 10 per cent of the value of the place in beautifying the yard, which is, to say the least, conservative, as such expenditure will add at least 40 per cent to the value of the property in a few years.

"In planning your grounds, draw a diagram to a scale, indicating thereon all buildings, walks, trees, etc., then visualize just what you wish your place to be and make your plan accordingly, setting down where each tree, shrub or vine is to be. Even though circumstances may not permit your finishing the planting this year, do not put it off, but put in first the trees and higher shrubs to be used in the background, filling in the others as you can. In

this way you will be working toward a definite end and the picture of the first year, even though half finished, will look better than the same lot of stock planted in a hit-or-miss fashion."

To help you select what shrubs and trees you will need for the different purposes mentioned, the following groups have been arranged, first, according to height, then according to color. In this way you can easily select just what shrubs are best suited for the purposes intended.

Shrubs Attaining a Height of 1 to 3 Feet

Red Flowers

Spirea Anthony Waterer. Small Flat Panicles. July and August.

White Flowers

Spirea, Collosa Alba. Small flat panicles. Blooms all summer.

Deutzia, Gracillis. Branches slender, habit nearly globular when mature. Blooms in May and June.

Syringa, Golden. Compact Round Shrub. Leaves bright yellow. Blooms in June.

Shrubs Attaining a Height of 3 to 4 Feet

Red Flowers

Wiegelia, Van Houttei or Eva Rath'e. Blooms profusely more or less throughout the summer.

White Flowers

Deutzia, Lemoine. Pure white flowers in large clusters completely covering the shrub in May and June.

Valuable for Leaf and Berry Effect

Barberry Thumbergii. Broad, bushy habit. Branchlets drooping. Leaves small, nearly round; turn brilliant red in fall, followed up by scarlet fruit which remains on stem greater part of the winter.

Shrubs Attaining a Height of 4 to 5 Feet

Pink Flowers

Almond, Pink double flowering. Double flowers almost completely cover the stem in May as leaves are starting.

White Flowers

Almond, Double Flowering White. Same as pink except color.

Hydrangea, Arborescens. Large round clusters of creamy white throughout summer. Foliage very fine.

Syringa, Lemoine. Loaded with white fragrant flowers, fine for cutting in May and June

Spirea, Thunbergii. Foliage feathery. Stems smothered with thousands of small white flowers in late April and early May. Drooping habit

Shrubs Attaining a Height of 5 to 6 Feet**Pink Flowers**

Japan Quince, Blush. Compact and dense. branches thorny. Beautiful blossoms in March and April.

Weigelia, Rosea. Flower freely in May.

Red Flowers

Japan Quince, Scarlet. Same as Blush above except color of bloom.

White Flowers

Spirea, Prunifolia (Bridal Wreath). Beautiful small double white flowers on slender branches in May.

Spirea, Van Houttei. Branches arching, leaves dark. Flowers almost completely cover the shrub the latter part of May and early June. One of the best flowering shrubs.

Shrubs Attaining a Height of 6 to 8 Feet**Pink Flowers**

Lilac, Belle de Nancy. Brilliant satiny pink in late May.

Red Flowers

Lilac, Mad. Ludwig Spaeth. Flowers single, dark purplish red.

Honeysuckle, Red Tartarian. June.

White Flowers

Hydrangea, Paniculata. Large cone-shaped white flowers early in August, changing to deep pink shortly afterwards.

Syringa, Garland (Mock Orange). Fragrant

creamy white flowers in May and June.

Lilac, Frau Damman. Largest white clusters of any lilac. May.

Honeysuckle, White Tartarian, June.

Lilac, Common White. May.

Snowball, Japan and Common. Large globular heads of pure white flowers in June.

Blue and Purple Flowers

Lilac, Common Purple. May.

Lilac, Pres. Grevy. A beautiful Blue; double; very large. May.

Varieties Valuable for Bark, Leaf or Berry Effects

Barberry, Purple Leaved. Small golden yellow flowers in early spring. Leaves dark purple, changing to red in fall.

Syringa, Golden. Small bush with golden yellow leaves.

Valuable Shade Trees for Street Planting

Maple, Norway. A large handsome tree with round spreading head; broad dark foliage; very hardy.

Maple, Sugar. Excellent street and shade tree, upright and dense growth. Foliage turning bright yellow and scarlet in autumn. Does well in almost every soil.

Elm, American. Lofty and spreading, with drooping branches. Most common and beautiful of elms.

Elm, English. Round-topped and sometimes open-headed. Foliage dark green, remaining several weeks longer than that of the American, and more delicately cut.

Sycamore, European. (Oriental Plane). A lofty wide-spreading tree, heart-shaped leaves, deeply cut. Valuable for its handsome foliage and free growth.

Trees for Ornamental and Specimen Planting

Beech, Purple-Leaved. Compact, symmetrical growth and crimson foliage early in the spring, changing to dark purple.

Catalpa, Bungei (Umbrella Catalpa). Per-

BENEDICT NURSERY COMPANY

fectly hardy. Makes a perfect umbrella topped tree. Very desirable.

Crab, Bechtel's Double Flowering. Medium sized ornamental tree of great beauty. Perfectly hardy. In early spring the tree is covered with perfectly double, small pink flowers like roses. Delicately fragrant.

Thorn, Red. Flowers deep crimson with scarlet shade. Very double.

Birch, Cut-Leaf Weeping. Probably most popular and desirable lawn tree in existence. Hardy and vigorous. Trunk straight and slender. Slim side branches droop as snow. Slim side branches droop in a most picturesque manner.
